STAPHYLOCOCCUS AUREUS DECOLONIZATION PROTOCOL

Wait for active lesions to heal before starting

1/ Hygiene measures

- Short **fingernails**, clean **hands** with **liquid soap**
- **Clothes**, undies and pajamas **changed 1x/d**
- **Sheets** changed as often as possible, washed at **60°C**
- **Don't share** hygiene products (deodorant, brushes)
- **Shared objects disinfected** as often as possible

2/ Shower : Lifo Scrub ©

- **1x/d for 7 days**
- **Lather** and **leave on** for 2 minutes, insisting on creases (armpits and groin)
- Use **clean clothes** and sheets afterwards

4/ Nose : Bactroban nasal ©

- **2x/d for 10 days**
- Using 1 clean **cotton swab** per side, massage a dab of ointment into the nasal cavity

3/ Mouth : DentoHexine garg © or Collunovar spray ©

- **2x/d for 7 days**
- After **tooth brushing**,
 - **Gargle** mouth with oral solution
 - or use the **spray**
- **Dentures**: soak 30 minutes in disinfectant solution

5/ After decolonization

Continue to do the hygiene measures listed in point 1

Children with **diapers**

- **Bleach baths** : 12ml/10L d'eau
- Or
- **Swimming pool**

Recurrent **styes** : Fucithalmic gel©

- **2x/d for 7 days**
- Apply a small amount of gel to the **eyeball**
