Multimedia Appendix 6. Automated medical history-taking device group: patient and resident physician satisfaction.

	Mean ± SD (range)
Patient feedback	
Overall satisfaction	4.3 ± 1 (2-5)
Understandability of AMHTD questions	4.4 ± 1 (4-5)
Symptomatology accurately described (%)	26/29 (90)
Wish to keep summary at home (%)	12/29 (41)
Wish to use the AMHTD at home (%)	14/29 (48)
Physician feedback	
Wish to obtain the integrality of the AMHTD summary form (%)	20/29 (69)
AMHTD helps finding DDs (%)	8/29 (28)
AMHTD allows to gain time	3.1 ± 1 (1-4)

AMHTD**:** automated medical history-taking devices; DD: differential diagnoses.
